Reflect-R-Mark™

Rowmark's Reflect-R-Mark flexible engraving product is not only outdoor weatherable and UV stable, but it reflects brightly in the dark when light hits the surface. The prism surface is weather-resistant and specially formulated to reflect light, similar to the way a reflector does on a bicycle.

Products listed are available in 2-ply 1/16" (1.6 mm) thickness, in 24" (+/- 1/2") x 48" (610 mm x 1,219 mm) sheets with a semi-gloss finish, and are suitable for routing, rotary engraving and vector cutting.

Specifications

Material

- » Laminated, UV-stable impact acrylic

Finish

- » Semi-Gloss

Thickness 2-ply

- » 1/16" (1.6mm)
(Gauges are approximate.)

Minimum Sheet Size

- » 24" x 48"
(610 x 1219mm)

Engraving Method

- » Laser vector cut
- » Rotating carbide

Cutting Depth

- » .003" (.08mm)

Usage

- » Interior signage
- » Exterior signage

Fabrication

- » Saws
- » Drills
- » Laser vector cuts
- » Screen prints
- » Heat bendable
- » Hot stamps
- » Bonds
- » UV stable
- » Outdoor weatherable
